Protecting your assets with Customized Security Solutions

Optinet Systems specializes in security solutions tailored and wrapped around your needs from a simple system addition or related to a more complex network design specific to your safety and monitoring requirements. Optinet Systems offers scalable solutions for small business to campus and multi site environments. Our installation and service technicians are trained, certified and highly experienced.

You can entrust your security projects with confidence to Optinet Systems, a federally incorporated and fully bonded organization.

Supporting your safety, security, restricted access and monitoring requirements.

“*Your team did a great job of installing the systems and dealing with the various on-site jurisdictions without any issues. Thanks to Optinet for a very satisfactory process from initial consultation to final build drawings.*”

Doug Hackett
Manager, Information Systems
 Squamish Terminals Ltd.
