Experience You Can Rely Upon

Comprehensive PCS and Wireless Services

Optinet Systems offers a portfolio of services supporting the development, construction, deployment and maintenance of Cellular and PCS wireless networks. Our experience spans the history of cellular deployments across Canada, the USA and around the world. You can rely upon Optinet Systems to deliver technical resources, personnel, strategic implementation and deployment of wireless networks, infrastructure upgrades and maintenance programs.

Optinet Systems, federally incorporated and fully bonded, is your local infrastructure team with global reach.
